Instruction DECORATIVE BOTTLE COVERS

Materials from Gütermann

- per cover:
- Sew-all thread in a matching shade
- Cotton fabric 145 cm wide, Collection SUMMER LOFT:
- Ornament fabric remnants in light green or rose pattern in blue and white or flower in blue and white,
- Bias binding in a matching shade
- Satin or corded ribbon

In addition

- Net lace remnant, approx. 25 x 60 cm,
- Approx. 30 x 40 cm iron-on volume fleece H 630,
- Any size of bottle

Tools

- Sewing machine
- Iron
- Scissors
- Hand gauge
- Tape measure
- Pins
- Tailor's chalk or fabric pen

Cutting

- Cotton fabric: 1 x bottle circumference + 2 cm x double height of the cover
- Net lace: 2 x 25 cm each x bottle circumference
- Volume fleece: 1 x bottle circumference + 2 cm x height of the cover
- Cut all pieces with 1 cm seam allowance

1. Fold the fabric for the cover crosswise with the wrong sides facing. Iron the fold (iron fold = upper edge of cover) and open again. Lay the volume fleece on the wrong side of the fabric and push the fleece to the iron fold. Iron the volume fleece on in accordance with the manufacturer's instructions.

2. Lay two layers of lace net on top of one another and mark the centre line with pins. Lay this centre line over the ironed fold in the cover. Attach the layers of lace net along the iron fold with the pins. Now stitch along the iron fold, leaving 1 cm open at the beginning and end of the seam.

3. Fold the cover material along the long edges with the right sides together. Pin the edges together and push the lace net away from the seam on the inside as this should not be sewn in (you can pin the folded lace net to the middle of the fabric so that it does not slip into the seam). Now sew the long seam on the cover. Iron the seam and turn the tube the right way out. Push the tube without iron-on volume fleece to the inside of the tube until the edges of the fabric are open at the lower edge with the wrong sides of the fabric on the inside. The inner and outer seam on the tube should be directly above one another. Pull the lace net upwards away from the attachment seam.

4. Cut the bias binding in the desired colour to the circumference of the cover + 2 cm. Fold the bias binding with the right sides together and iron the edge well. Slide the folded bias binding over the open edges of the cover. Pin all the way around and fold the end of the binding inwards to a width of 1 cm. Sew the bias binding close to the edge through all layers from the right side. Push the cover over the bottle and tie the satin ribbon over the net lace around the neck of the bottle.
